

# Kraus CNG Dispenser Training

**Take advantage of Kraus Global hands-on training programs for all levels of technical staff.**

Efficiency is the life blood of any fleet. In order to keep your dispensers well maintained and running at peak performance ensure your technicians are trained by a Kraus Technical Services trainer. Kraus offers high quality, hands-on training for all technical levels, ensuring your team has an excellent understanding of your Kraus equipment and dispensers.

## **Complete CNG Dispenser Training from Kraus Global includes:**

- Understanding CNG dispensers, theory of operation & safety
- Installation & set up
- Step by step start up
- Operation & regular maintenance
- Additional settings & parameters
- Troubleshooting real life examples

- Valve rebuild theory & hands on
- Dispenser calibration

**Program designed to increase the success of:** service technicians, operators, CNG contractors, project managers, executive management exploring the possibility of using CNG

This interactive 2-day program, held at Kraus Global in Winnipeg, Canada, uses a variety of multimedia, traditional classroom style documentation and hands on experience to develop skills essential for success in the field. Class size is limited to ensure an intimate setting for hands on work and greatest success.

If you have a specific training request or prefer on site training, we will create a custom program based on your requirements.
